

Now possible

Not a DSP
Not a EQ
Not a DAC
Not a DRC
Not a Filter

Never heard
anything like this.

DREi PRO
DeIntermodulator
& Speaker Optimizer

As one audio professional to another, no half truths, this works.

This will optimize your sound system, especially in concerts and clubs, giving you results that would have cost many times more than its price. DREi PRO will always improve any system you have.

DREi tech

The insertion of this technology gives greater sound system performance with neutral, smoothly flowing, natural sounding, crystal clear music.

SYNERGY CONTROL

Includes 5-position switch to adapt the Synergy and optimizing the sound coming from your speakers, your audio system and your environment.

TRUE BYPASS

When turned off, the inputs are deviated to the outputs so the power of DREi process can be checked easily and instantly.

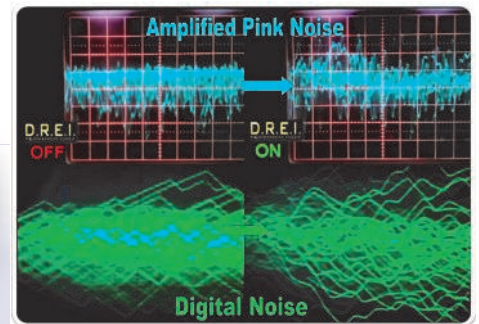

LOCK
Functions

Highly recommended for live sound

Its extraordinary control over the total energy input to amplifiers allows higher levels of sound pressure.

DREi attenuates the harmful **INTERMODULATION** between signals with different frequencies which occur in all elements of an audio system and which impair the purity of the original sound signal. Add it to your current system and discover how the music should really sound.
